

Data

The following data will be used:

- List of neighborhoods in Culiacan.
- The latitude and longitude coordinates of those neighborhoods.
- Businesses around neighborhoods, particularly data related to restaurants.

The information of the neighborhoods in Culiacan will be extracted from the page: <https://micodigopostal.org/sinaloa/culiacan/>. On this page you will find a table with all the neighborhoods and their postal codes.

For the data of the latitude and longitude of these neighborhoods, the Google Maps API will be used.

Finally, to find the businesses that are in each of the neighborhoods, the foursquare api will be used.
